· Other information (about experimental toxicology):

Ethanol is released upon contact with water (humidity). According to literature, ethanol (67-17-5) irritates the mucous membranes, slightly irritates the skin, degreases the skin, is narcotic and may cause liver damage.

During the application of the product 2-Pentanonoxim (CAS: 623-40-5) is released. 2-Pentanonoxim is harmful if swallowed, causes serious eye irritation, may cause damage to organs through prolonged or repeated exposure and is harmful to aquatic life with long lasting effects.
